

All MEZ electric motors use DURIGNIT© IR 2000 (Inverter Rated) insulation system

MEZ Electric Motors are Inverter Ready Motors-as Standard

DURIGNIT© IR 2000 Insulation system exceeds the values laid down in motor standards- designed with Inverters in mind!

- Comprises high-grade enamelled wires and insulated materials combined with solvent-free impregnating resin
- Designed to withstand inter-turn, inter-layer and phase-to-phase inverter voltages
- All motors are manufactured with Class F insulation.
- All motors are Tropicalized as standard
